Leonard Cheshire is a leading charity dedicated to empowering people with disabilities to live, learn, and work as independently as possible. With a history spanning over 70 years, we are passionate about creating a world of inclusion and opportunity. Our tailored support services, care homes, and training programs provide individuals with the tools and confidence to break barriers and thrive.

Through innovative programs like our Assistive Technology initiative, we help unlock potential, facilitate independence, and build brighter futures. Social isolation and loneliness are challenges that disabled people are often faced with, but the possibilities that technology offers can be life-changing.

Led by an award-winning team of caring experts, we develop and provide 'specialist person-centred' assessments and interventions, improving the care experience for residents and staff alike. Whilst also improving wellbeing, self-belief and greater opportunities for social inclusion, our mission is to ensure that such technology is available to all, whatever their ability.

Health. Inclusion. Innovation.  
Registered Charity 261488

You have the power to make a real difference as we work towards a world free from leprosy and lymphatic filariasis (LF). For over 100 years, Lepra has helped people affected by these conditions rebuild their lives.

We focus on Health, Inclusion, and Innovation in everything we do, and none of this would be possible without your invaluable support.

Be part of our vision: a world free from leprosy and LF, where everyone can live with dignity and equality.

## CHANGING LIVES - BUILDING FUTURES

**DeafKidz**  
INTERNATIONAL  
Registered Charity 1151219

For over a decade, DeafKidz International has led the way in reducing the abuse and neglect of deaf children worldwide. We work with communities, local partners, children and their families to respond to deaf children's protection and wellbeing needs.

There are 32 million deaf children worldwide, many of whom face stigma, social exclusion, and a severe lack of support. This not only impacts their opportunities but leaves them more open to abuse: **globally deaf children are 3 times more likely to suffer abuse than hearing children.**

We use play-based and EdTech approaches to ensure deaf children can live safely, without fear of abuse or exploitation.

We believe that health is a human right and the key to a brighter future. Good health opens up the possibility of better education, economic empowerment, political participation, and freedom from poverty. Yet, across Africa, less than 1 in 2 people (46%) can access the healthcare that they need.

Amref Health Africa's approach is community-led. We partner communities to identify their unique health needs, co-design solutions to address the factors that influence their health, in order to increase primary healthcare access to all. We train health workers at all levels of the system to better equip them to serve their communities. And, we work with governments and the private sectors to advocate for sustainable health financing for stronger health systems and more equitable health access.

We work across 35 African countries to bring about lasting health change.
